

Terms of Use for QPC Drawings and Solid Models

Restrictions: The information provided herein has been developed by QPC Fiber Optic, LLC (QPC) at QPC's expense. It is the sole property of QPC and is furnished on the condition that it will not be disclosed, reproduced in whole or in part, used to solicit quotations from competitive sources, or used for manufacture by anyone other than QPC without written permission from QPC. It may be used only for engineering evaluation and incorporation into technical specifications and other documents that specify procurement of products from QPC.

Cautions: The provided drawings and 3D models are intended to provide a general visual representation of the size and shape of the actual products. The products depicted in the drawings, models, specifications, and other types of content may not be to scale or reflect the most current version. 3D models should be used in conjunction with the associated sales or customer level drawings, datasheets, and specifications.

Details: Detailed dimensions and features of the products may have been omitted from the drawings or models to facilitate development or to preclude dissemination of proprietary dimensions and features. In some cases, a "Skin" or "Shrink Wrap" may have been applied to a 3D model containing intricate detail, and then an .STP file (or other output format) created from the "Skin" or "Shrink Wrap" in an effort to minimize file size or preclude dissemination of proprietary dimensions and features. If detailed features or proprietary dimensions are desired, a Non-Disclosure Agreement (NDA) will be required before such information will be provided.
